

Michelin Truck Tyre Guarantee*

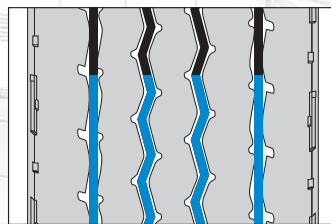

For each MICHELIN X[®] Works™ tyre purchased, Michelin offer a guarantee against accidental tyre damage covering the first six months of use.

You can then therefore benefit from the durability and safety of your new MICHELIN X[®] Works™ tyres with complete peace of mind.

* Refer to the general terms and conditions at www.michelintransport.com.

MICHELIN X[®] WORKS™ XZY

Regrooving pattern

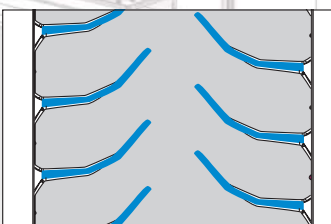

4 grooves: 315/80 R 22.5
3 grooves: 13 R 22.5

Regroovable and soon to be retreadable as a MICHELIN  Remix

Regroove depth:	Approximate regroove width:	Suggested blade:
H = 4 mm	8 to 10 mm	R3

MICHELIN X[®] WORKS™ XDY

Regrooving pattern

Regroovable and soon to be retreadable as a MICHELIN  Remix

Regroove depth:	Approximate regroove width:	Suggested blade:
H = 4 mm	6 to 8 mm	R3

Robustness for the worksite and endurance for the road.

“Reduce risks with a tyre guarantee”

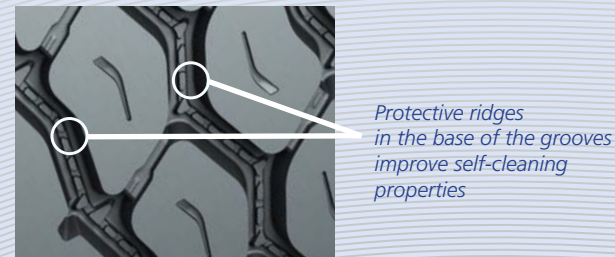

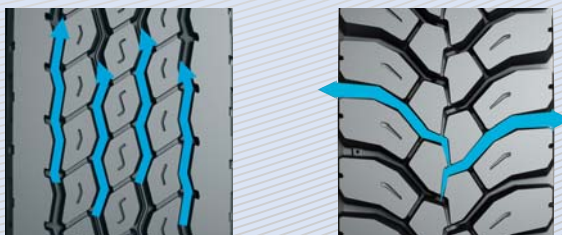

Improved resistance to accidental damage*

Reduced stone retention*

More efficient water and mud dispersion

Improved resistance to damage at the base of the tread groove

New rubber compound offering improved resistance to accidental damage

Larger metallic protection ply improves protection against penetration

Reinforced shoulder area improves resistance to lateral impact damage

3 wider metallic reinforcing plies improves resistance to accidental damage*

MICHELIN X[®] Works[™] higher density of metallic casing cables*

315/80 R 22.5

* Internal Michelin test data vs MICHELIN XZY2.

+ Safer

Improved handling on and off road

- Wider tread grooves for improved grip on wet road surfaces.
- Tread groove design optimised to improve self-cleaning properties.

30%** less stone retention

- MICHELIN X[®] Works[™] XZY: protective ridges in the base of the tread grooves.
- MICHELIN X[®] Works[™] XDY: V shaped tread grooves vary in width and pitch.

+ More economical

Improved mileage potential*

- New MICHELIN X[®] Works[™] casing with a higher density of metallic casing cables for greater casing endurance. The tyre has an improved mileage potential and the casing is designed to be retreaded several times.
- Crown architecture designed for an optimised contact patch with an improved wear pattern, resulting in improved mileage potential.
- Compact central tread blocks for improved resistance to tread tearing, leading to extended tyre life.

Improved resistance to accidental damage*

- Architecture optimised for challenging conditions of use.
- New robust tread with improved resistance to tread tearing.
- Reinforced shoulder area has improved resistance to lateral impact damage.

+ More environmentally friendly

A tyre designed to be retreaded several times

- Manufactured in Michelin factories to the same quality requirements as a new tyre, the MICHELIN X[®] Works[™] Remix tyres offer you similar levels of performance to new MICHELIN X[®] Works[™] tyres, whilst using 50kg less material.

A tyre designed to be regrooved

- To extend mileage potential and therefore tyre life.
- Enables the use of the tyre for longer in its most fuel efficient state.

* Compared to XZY2/XDY3 in the same dimension.

** Internal Michelin test data vs MICHELIN XDY3.
